CHINDOFF
INTEGRATED ENVIRONMENTAL MANAGEMENT

A THOROUGHLY SOLUTION OF PEST PROBLEMS
从根源上解决虫害问题的方案

清道夫环境治理手册

人类的傲慢与偏见，对生态环境造成了不可逆转的破坏。我们需要对所谓的“害虫”持有正确的尊重。例如，老鼠的入侵，并不是因为老鼠的“恶魔”天性，而是因为它的生存需要而已。故意虐待被捕获的老鼠，并非一个人所应有的行为。在新西兰等国家，这甚至是一种犯罪行为。尽管我们在有些情况下不得不选择与它们的对抗，但这不代表我们可以居高临下地蔑视它们。

The humanity with the prejudice has created the irreversible destruction to the ecological environment. We should respect to all the lives, even if the insect. For example, in order to survive, mouse could slip into your bedroom. Acts of the mouse which you caught cruelty is not Humanity. In New Zealand, this is even one kind of criminality. Although sometimes we have to do so, it is not polite to despise them.

让人与虫和谐共生

Symbiotic harmony between human and PEST

这个世界所有的生命是彼此互相依附、赖以生存的共同体。清道夫作为专业虫害风险管理服务机构，我们发心于保护环境和善待动物，不仅仅解决虫害问题的表面现象，更是帮助客户发现和清除各种造成虫害风险的根源，从而从根本上避免孳生蟑螂、老鼠等，减少人与虫的冲突，让人与虫实现和谐共生。

All lives in the world are depend on each other. As the Specialized PRM (Pest Risk Management) Service organization, The CHINDOFF may help you. We will protect the environment and be kind to the animal. Besides, not only we solve the superficial phenomenon, but also we help our customer to discover and eliminate each kind of problems which caused by the insect. And then we could avoid breeding the cockroach, the mouse from the root, reduces the conflict between humans and insects, and to be Harmony and Symbiosis.

清道夫奉行“以商业为契机，搭建善缘平台，奉献社会”的经营宗旨，用诚信和良心向客户提供品质卓越的虫害风险管理服务。我们坚信每一次与人接触都是一次减少人与虫矛盾的机会。

The ethos of CHINDOFF is: "based on the trade, be friendly to others, devote to the society." We always provide the best service with the good faith. So it is a good opportunity to reduce the Contradictory when we contacts with the customer each time.

我们的专业团队能根据不同企业的营运特点和食品安全要求，通过细致的现场调研，为不同的企业制定有针对性的专业服务方案。

Customer first! Requirements from customers are different, so we must work out more and more different, professional proposal to different enterprises.

虫只是结果，而不是原因

The truth ---

"Pest ,result not reason"

一旦环境中出现虫，我们首先想到的是如何进行灭杀。当然，及时的灭杀会让我们产生立竿见影的感觉，但由此带来的副作用也相当严重：

- 1、杀完又有，麻烦不断
- 2、化学污染的风险
- 3、掩盖隐藏的虫害管理风险
- 4、成本的不可控制

Afer you killed the pest ,the truble is also coming.

1. Regeneration, a vicious spiral
2. Chemical Pollution
3. Cover the Essence of PRM
4. Cost waste

为了从根本上解决问题，我们更应该关注虫害产生的根源！虫到底是怎么来的？或许下面一组图片会对你有所启示：

When pest appears, what do you think of? Where does the pest come from? How to do it? Perhaps you don,t know. The follow pictures will tell you!

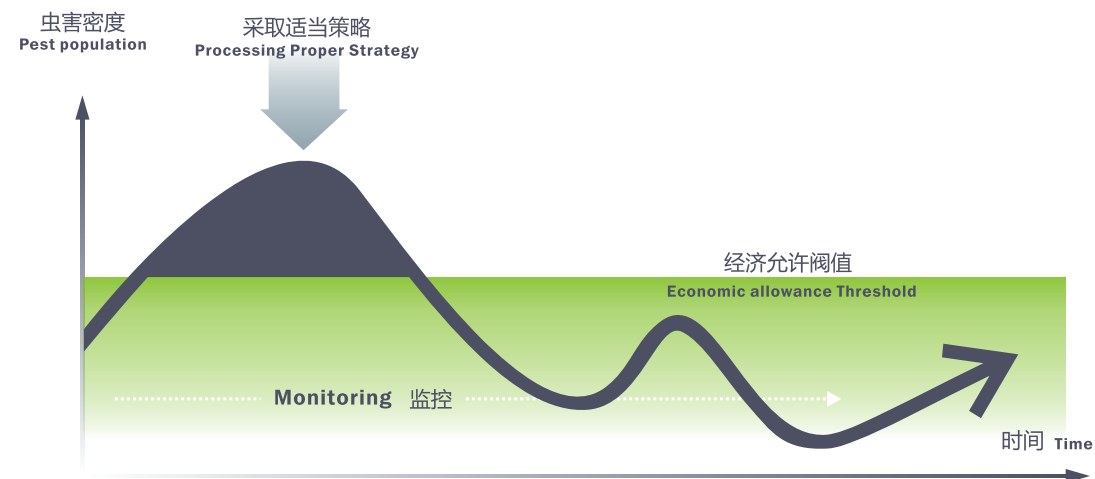

虫害风险管理原理

Principle of PRM

虫害风险管理的目标

PRM target

通过对环境中潜在风险的长期监控，并采取适当策略，使得虫密度稳定控制在经济允许域值（允许阈值的大小，根据企业的品质控制标准设定）以内，将虫对客户正常经营活动的影响降到最低程度。

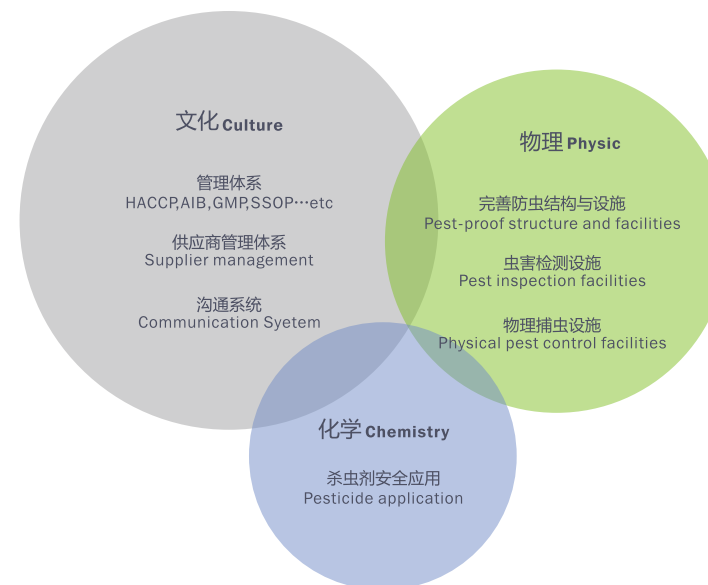

Monitor the potential risk of environment for a long time, and processing proper strategy, make the pest pollution within the limits of economical allowance threshold.And then fall the influence to people' s normal life to the lowest degree.

虫害风险管理的主要内容

Main components in PRM

在虫害风险管理这一整体思想指导下，我们的工作重心在于建立全面的虫害管理体系和沟通渠道等，其次，我们还将建议我们的客户完善防虫设施，并使用专业器械进行虫害检测和物理捕捉；在客户同意并必要的情况下，我们会在局部区域使用化学处理方式进行虫害防治。

With the theory of PRM, we will focus on building the completely system of pest management and communication channel etc. In addition, we also adopt some physical methods for pest examination and capture. Especially some chemical ways could be used in local areas.

虫害风险管理方案 Program of PRM

检查——现场检查，分析虫害风险
Check—Check On the spot and analysis the risk

沟通——与客户充分沟通，帮助建立虫害风险管理系统
Communication—communicate with the customer and help them establish the system of PRM

治理——多种安全手段，处理虫害偶发事件
Govern—many kinds of security methods, to deal with the emergency

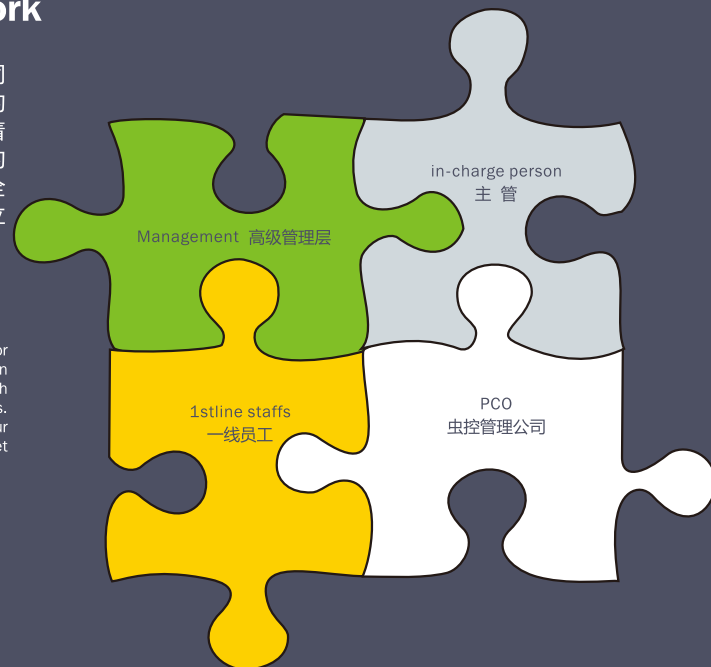

监测——持续监测虫害变化趋势，消除虫害风险
Monitor—monitor the change tendency and eliminate the risk

共同参与，才能成功 Success with team work

传统观念认为，虫害控制只是虫控公司单方面的责任，其实不然，环境中虫的出现，与客户的环境及其人员行为有着密不可分的关系。因此，要取得良好的虫害防治效果，除了需要虫控公司的全力以赴，更需要客户方全体人员的鼎力支持与配合。

The traditional ideas believed that it is responsibility for pest control company to service all. But in fact, when pest appearance, there is something wrong with environment and the behavior of our customers. Therefore, to make the good effect, we must try our best. Meanwhile, we also hope we can get cooperations and supports from our customers.

鼠类管理 Rodent management

在鼠害的发生区域，我们会细致入微地检查鼠类的活动迹象、可能的进入点以及可能会导致鼠害的各种条件。我们会根据调查情况确定相应的处理方法，以确保将目标区域的鼠群全部驱除或控制。在此过程中，我们还将配合客户的相关部门落实各项防鼠措施，减少鼠类进入建筑的机会。

In the area being the mice against, we will inspect sign of rodent, routs of invasion, and the condition of resulting in rat Disasters. According to the survey situation, we will identify ways of the treatment, To ensure that the target region of all get rid of rats or control group. And we will help you to found the prevention Devices against rodent together in the process.

爬虫类管理 Reptile management

内部环境的卫生管理是爬虫控制中最重要的一环。清道夫在开展清除虫害工作的同时，会协助客户改善现有的卫生状况，消除缝隙等爬虫栖息地，从而为防止虫害再度进入打下良好的基础。

Sanitary control of your home environment is the most important of reptilia control. Chindoff will carry out the work of removal of pests, at same time we will help you improve sanitary conditions in being to eliminate the reptilia habitat like gap, and then in order to prevent re-entry into the insect has laid a good foundation.

白蚁控制 Termite management

白蚁对很多建筑都带来了很大威胁，清道夫有系统的方法进行监控和治理白蚁。我们利用特别的探测器放置于目标保护区域的周围。当白蚁进入探测器后，我们会换上白蚁药饵。药饵会逐渐将白蚁群体控制到完全消灭为止。之后，我们会再把探测器和药饵装置装上，对目标保护区域提供连续保护。

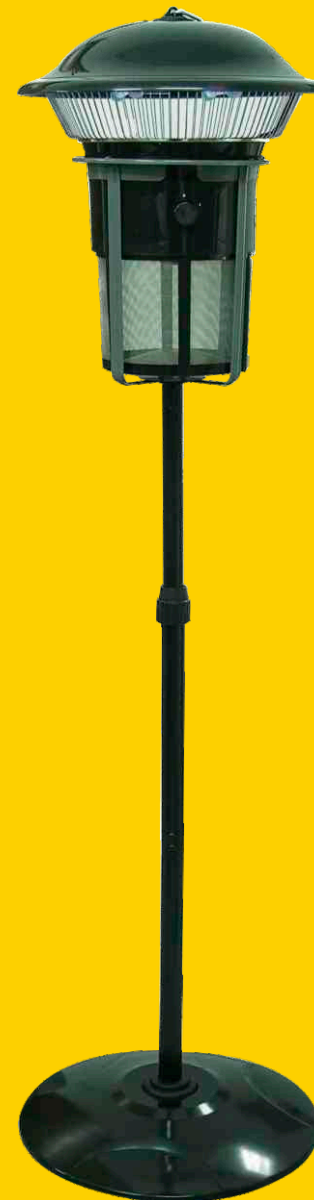

Termites to the Many buildings have brought a lot of threat. We build special finder monitoring in the Protected area objectives. When the termite enter we will put the poison bait into the finder. The bait will kill the termite until all population piece by piece. after that we will build the finder and bait in the Protected area objectives, to protect constantly.

飞虫类管理 Winged insect management

使用普通药剂很难完全消除飞虫，反而因药剂的喷洒损伤建筑物、设备和物品，而且对人体也会产生危害。一般的飞虫管理装备是电击式杀虫装备，飞虫在接触到电气装置的瞬间即被分解，但存在各种病原菌和细菌扩散的危险。清道夫引进的新一代粘捕式灭蝇灯，已经被证明是一种清洁有效的苍蝇控制方法。这种灭蝇灯不仅可以捕捉飞虫，作为对一些无效的不完善结构的补救；同时也能监测虫害的活动，提供关于污染的来源。据此我们才能正确地发现飞虫来源并最终消除这些飞虫。以灭蝇灯为核心的飞虫防御程序符合AIB和YUM标准，使得客户在面对国家卫生防疫和HACCP的严格标准时应对自如。

It's not easy to clean up the winged insect if you use general medicine. Instead, it could damage the buildings, the equipment and the goods. Even it is harmful to our health. Nowadays the common equipment they use will be the electric shock. When pest attach, and decomposed at once, it's dangerous. Now, we CHINDOFF have new equipment which looks like a lamp. It proved that this kind of lamp is useful. Not only it can deal with the fly and mosquito, but also can test the origin of the pollution. Therefore we can discover the origin correctly and eliminates these winged insects completely. This system conform to the standard of AIB and the YUM. It is so easy for our customer to meet all kinds of inspection as HACCP etc.

清道夫优秀的供应商选择

The first-level vender

清道夫具有严格的供应商合作机制和产品审核制度，确保每次服务中使用的药剂和器械符合安全、高效和环保的要求。清道夫的专业产品包括国内外先进的飞虫诱捕器光触媒灭蚊器、灭蚊磁、粘捕式灭蝇灯和鼠类、昆虫诱捕设备。同时，公司已与多家国内国际知名企业如南通功成、大连三利、扬农化工、盛怡Mosquito Magnet、新加坡侯杰、德国Bayer、德国BASF等建立起了良好的合作伙伴关系。

The CHINDOFF has strict supplier cooperation mechanism and product audit system, ensure that every service reagents and equipment used in accordance with the requirements of safety, efficiency and environmental protection. Those professional products including the fly in the domestic and foreign advanced traps photocatalytic mosquito killer, mosquito magnet, sticky trap type flykilling lamps and rodents, insects, trap device. At the same time, the company has with a number of domestic and international famous enterprises such as nantong successful, dalian sanli, Yang agriculture chemical, ChengYi Mosquito Magnet, Bayer in Germany, BASF in Germany, BentzJaz in Singapore, established a good cooperative partnership.

培训及品质监控

Training & Quality control

我们相信培训对公司和客户都非常重要。清道夫所有服务专员必须接受定期的培训课程，内容包括理论和实践，并需要进行测试及考核，以评审员工的表现。我们还对客户具有针对性的培训。

Training is important for CHINDOFF and our customers. All of our staff must be trained again and again. We need to supply the training lessons like The theory and practice of PCO. After the training, in order to appraise their performance, we also have test. In addition, we usually do some useful training for our customers.

优秀品牌的品质保证

Good brand of quality assurance
